

Health, Safety and Wellbeing Policy

Tāmaki Health acknowledges the importance of health, safety and wellbeing in the workplace, and the requirement to meet its Health and Safety legal and moral obligations.

People are our most important asset. If we look after the health, safety and wellbeing of our people our business and communities will flourish.

Purpose:

The purpose of this policy is to:

- demonstrate our leadership's commitment to Tāmaki Health's workers' health, safety and wellbeing including the management of psychosocial risks
- provide the framework to identify and eliminate or minimise health, safety and wellbeing risks to all Tāmaki Health workers, contractors and visitors and anyone else who may be affected by our operations
- provide the framework for continuously improving worker health, safety and wellbeing
- provide the framework for a collaborative approach to identify and solve health, safety and wellbeing issues with our workers

Scope:

Tāmaki Health's, Health, Safety and Wellbeing Policy applies to all Tāmaki Health workers (including contractors) and patients and visitors to Tāmaki Health facilities. .

Policy statements:

Tāmaki Health will do all that is reasonable, and practicable to protect the health, safety and wellbeing of all its workers, (including contractors), patients and visitors.

For the purposes of this policy, and to be consistent with the Health and Safety at Work Act (HSWA) 2015, health means physical and mental health.

Workplace health, safety and wellbeing is everyone's responsibility.

- only workers that are skilled, trained and have the expertise are engaged to perform required work tasks
- Workers are appropriately inducted, supervised and or provided with additional information and training, to perform required work tasks safely
- the right equipment, including Personal Protective (PPE) and Emergency Equipment for every work task, is provided, fit for purpose, and maintained in accordance with best practice and audit requirements
- all risks and incidents including those that involve injury, illness, near misses or the potential for injury or illness (including impairment) are reported and notified, and, risk management controls implemented and monitored

- following all work related injuries, and non-work injuries workers are supported where appropriate, to return to and or remain at work safely
- Health and Safety representatives are elected, trained and supported in accordance with HSWA 2015
- Health and Safety objectives are established and reviewed annually in accordance with internal audit and performance processes, and provide ongoing opportunity for continuous improvement in health, safety and wellbeing
- strategies to ensure worker engagement and participation are implemented, and worker feedback is considered
- Health and Safety is an agenda item, and a primary consideration, at all meetings

Roles and Responsibilities:

Health, safety and wellbeing in the workplace is everyone's responsibility with everyone having a role to play.

Tāmaki Health's Executive Leadership Team (ELT), and Board:

- have overall responsibility for Health and Safety, compliance with HSWA 2015 and other relevant regulations and standards
- will acquire and keep up to date on work Health and Safety matters, including the hazards and risks associated with the work
- will ensure that resources and processes are available to eliminate health, safety and wellbeing risks to workers from undertaking their required work tasks
- will ensure that resources and processes are available to minimise health, safety and wellbeing risks to workers from undertaking their required work tasks
- will ensure appropriate systems are in place for receiving, considering and responding to information regarding incidents, hazards and risks and that these are responded to in a timely manner
- will ensure health, safety and wellbeing performance is regularly reviewed
- shall assign a senior executive or board member to review all serious incidents including those that result in Worksafe notification, in a timely manner

Senior Management Team

General Managers:

General Managers are responsible for reviewing the reports for the clusters within their area of accountability and ensuring that issues are escalated and resolved in a timely manner.

Cluster Managers:

Cluster Managers are responsible for the day-to-day management of health, safety and wellbeing of all workers (including contractors) visitors and patients within their service.

- all hazards and associated risks are identified, managed in accordance with policy and best practice and communicated and understood by all relevant parties
- Health and Safety induction and training is provided commensurate with the position, person, required work tasks and the environment
- Health and Safety information including the risk register is kept up to date and accessible
- Health, safety and wellbeing is a standard agenda item as a minimum at every monthly staff meeting, considered and discussed at all other meetings

- All incidents and near misses are reported, managed and closed in accordance with the "Incident Policy"

Property and Procurement Manager:

Is responsible for ensuring product and property procured follows best practice, is maintained and managed in accordance with required standards, NZ regulation and policy.

- shall consult with the AOHSM, and other internal specialists as necessary, on all matters relating to health and safety, including those relating to asbestos, equipment safety, hazardous substances and contractor management etc.
- ensures the implementation, maintenance and monitoring of Tāmaki Health's Asbestos Management Plans and registers, emergency response procedures, property and equipment certification, equipment and contractor register and maintenance management system
- is responsible for all contract and contractor management, including review and approval of new and existing contractors, contractor risk assessments and safe work procedures etc. prior to such work commencing in consultation

Audit, and Occupational Health & Safety Manager (AOHSM):

Is Tāmaki Health's subject matter expert on matters of health safety and wellbeing and shall be involved and across all business activity and operations involving matters of health, safety and wellbeing.

The AOHSM ensures the development, implementation and ongoing maintenance of Tāmaki Health's health, safety and wellbeing policy, framework, plan, and reporting system procedures; and supports development of associated and wider business and operational policy and procedures, and training.

Provides the first point of contact and liaison between WorkSafe and or other regulatory agencies and others, on matters of workplace safety, agency interaction, and notification of notifiable events (incidents); and shall consult and or liaise with external specialists or others on matters of health, safety and wellbeing where such expertise is not available or in scope.

Head of Organisational Development:

Shall ensure appropriate Health and Safety training and induction material is developed, delivered and maintained, ensuring all workers are provided necessary basic and specific training according to their roles and responsibilities.

Ensures employee training records are maintained in Tāmaki Health's learning and development management system, providing alerts to staff and managers where refresher/repeat training is required.

Source external training following review and approval of content from Tāmaki Health's AOHSM.

Workers:

Title: Health, Safety and Wellbeing Policy	Last reviewed: May 2025	Next review: May 2027	V5
Document Owner: AOHSM	Authorised by: AOHSM		3 of 8

- take reasonable care for their own health and safety, and ensure that their acts or omissions do not adversely affect the health and safety of others in the workplace
- follow reasonable instructions given by the PCBU to protect their health and safety
- identify and report any workplace incidents or hazards to their supervisor
- cooperate with any reasonable policy or procedure of the PCBU relating to health or safety at Tāmaki Health that has been communicated to workers.
- are engaged to participate in the identification and management of health, safety and wellbeing risks and solutions

Visitors:

- take reasonable care of their own health and safety
- must not put themselves or any other person at the workplace at risk
- must comply with reasonable requests

Health and Safety Representatives:

Are worker elected and trained representatives to:

- represent the workers in each clinic in matters relating to Health and Safety
- investigate complaints from workers in their work group
- participate in annual health and safety representative training
- inquire into anything that appears to be a risk to the health or safety of workers at work
- assist with risk assessment, incident investigation and audit, document development and other activities as deemed appropriate and agreed
- monitor the measures taken to reduce identified risks
- make recommendations relating to work Health and Safety
- promote the interests of workers in the work group who have been harmed at work.

The Health and Safety Committee:

- The committee is responsible for the implementation, monitoring, review and planning of Health and Safety policies, systems and practices.
- Reviewing emerging trends and controls for identified health and safety risks
- Membership will include management representatives and elected health and safety representatives from each clinic or group as agreed by the committee.
- The Health and Safety Committee is to be chaired by the AOHSM or delegated.
- The Health and Safety Committee is to meet at least every 6 months
- The Health and Safety meeting minutes are sent to the cluster managers to distribute to clinics and other managers to progress actions and give information/evidence of discussion around issues raised.

WorkSafe

WorkSafe is New Zealand's primary work Health and Safety regulator.

Tāmaki Health shall, where a request has been made by a duly authorised WorkSafe officer provide access to worksites, operations and information when requested.

Before access is granted, the Tāmaki Health representative approached must contact the AOHSM to advise of such request to enter. In the event an information release is requested

Definitions:

The following provides a list of commonly used terms and definitions relating to health, safety and wellbeing, that may be referred to in this and other associated policy and procedural documents.

(Terms and definitions may be added to or updated at any time, by the AOHS, without formal requirement or approval from the document authoriser)

Contracted Worker	Any worker who works under contract
Contractor	Any business or sole operator, who provides services and or goods, including equipment under contract.
Control Measure/Control	Something introduced to manage, direct or mitigate workplace hazards and associated risks.
Corrective Action:	Is any activity that has been determined necessary, to address and or mitigate a hazard and its associated risks as a result of assessment and or investigation
Hierarchy of Controls	A system used in industry to effectively mitigate hazards and their associated risks in the workplace, through eliminating or minimising those risks.

	Most effective Least effective https://www.worksafe.govt.nz/topic-and-industry/hazardous-substances/managing/risk-management/
Environmental incident	An incident that has a direct impact on the environment
Health and Safety Committee	A formal group, consisting of a range of personnel to support ongoing improvements to health and safety in an organisation and or workplace.
Health and Safety Representative (HSR)	A worker, formerly elected by members of their workgroup, tasked to represent their workgroup in matters of health and safety in the workplace.
Health Monitoring/Surveillance	Process of monitoring a workers' health against their baseline, where the work performed poses a risk of harm to the worker.
Health and Safety Management System (HSMS)	A collection of developed plans, programs, tools and procedures aimed to systematically manage health, safety, wellbeing and risk in the workplace.
Incident	An event that results or has the potential to result in, injury or ill-health (harm) to a person, animal, damage or other forms of loss to place or thing.
Work Related Injury or Illness	Any injury or illness that has occurred as a result of the workplace or, work-related activities performed.
Notifiable Event	Is a serious health and safety incident that must be reported to WORKSAFE, having resulted in a person's death, serious illness, injury, or unsafe situation, in the workplace or as a result of work done.
Lost Time Injury (LTI)	A work-related injury or illness that results in a worker (employee) being unable to work for at least one full shift.
Minimise	The ability to reduce the potential risk and or level of harm a hazard or workplace situation poses, and where the hazard cannot be eliminated.
Near miss	An event which did not result in injury, illness, damage or other loss, but could have.
Person Conducting a Business or Undertaking (PCBU)	Refers to an individual person or organisation having a 'primary duty of care'. Most New Zealand businesses, including corporations, sole traders or self-employed, are classed as PCBUs.
Personal Protective Equipment (PPE)	Anything used or worn by a person (including clothing and equipment), to minimise a risk of harm to that person's health and wellbeing.

Psychosocial harm	Harm as a result of work, work arrangements and activities that negatively affect a worker psychological or physical health.
Reasonably Practicable	Doing all that is considered reasonable, to mitigate the risk and likelihood of something going wrong or, someone, thing or place being harmed.
Regulator	An independent government authority/agency responsible for monitoring and or enforcement of legislation.
Risk	Is the potential for something bad to occur to a person, place or thing?
Risk Assessment	A formal review of a workplace and or work activity done or to be done, that identifies health and safety risks that are present or could arise, and the necessary and prioritised controls needed to mitigate those risks. The process of assessment follows 5 simple steps: • Identify hazards • Assess the risk of each hazard identified • Control the risk of harm to as low as is reasonably practicable (ALARP) • Reassess the level of risk after controls introduced. • Review and monitor the controls to ensure they are working, and risk remains acceptable
Risk Profile	An assessment providing an indication of perceived and actual risks a situation/activity, workplace or organisation may be posed with.
Severity Rating	A ranking assigned to an event, to describe the level of consequence that has occurred as a result of the event. The rating considers, degree of impact, harm (occurred or possible) and actions required.
Worker	An individual who carries out work for gain or reward, and includes employee, contractor and sub-contractor, employee of a contractor or sub-contractor, apprentice or trainee, a person gaining work experience or on a work trial, commercial visitor or, a person performing volunteer worker.
Workplace	Any physical location where work-related activities are performed.
Work-related Ill-health	A health condition or disorder caused as a result of work activity, work condition and or exposure to a substance hazardous to health.
WORKSAFE NZ	New Zealand governments primary health and safety regulatory.
